Cut & Composed brings together 46 collage artists exploring the dynamic intersection of music and visual art.

Each artist has selected a song title from the 1970s or 1980s that resonates with an existing work, drawing on the energy, nostalgia, and cultural shifts of these iconic decades.

Through layered textures, found imagery, and personal associations, the exhibition highlights how music shapes our visual language, influences memory, and evokes emotion.

Cut & Composed invites viewers to experience collage as a visual mixtape.
